Origin

\*For each 100 gr

## BENEFITS

### Anti-Anxiety and Antidepressant Effects:

Extracts from the plant have shown potential in reducing anxiety and improving mood, possibly due to their interaction with neurotransmitter systems.

### Skin and Hair Health:

The antioxidants and flavonoids in butterfly pea may promote healthier skin and hair.

### Anti-Inflammatory and Pain Relief:

The plant has been traditionally used to treat inflammation and pain, with some studies supporting its efficacy in reducing inflammation.

## HOW TO PRESERVE POWDER

- The product has a **humidity** content of less than **3%**. To preserve it, the product must be completely **sealed** to prevent ambient humidity from entering and damaging it.

## USES

The vibrant blue color of butterfly pea flowers is often used as a natural food coloring in beverages, desserts, and culinary dishes.

When mixed with acidic ingredients like lemon juice, the color changes to purple, adding a visually appealing element to foods and drinks.
